

9695 COMBINE REPAIR TIME SCHEDULE

Form Number 4283382M2

Contents

Section	Description
1	Decals and Labels
2	Engine
3	Cab
4	Electrical
5	Feeder
6	Lateral Tilt
7	Processor
8	Separator
9	Grain Bin & Elevators
10	Shields
11	Hydraulics
12	Drives
13	Auto Guide

NOTE: This Repair Time Schedule (RTS) can be used with Repair Time Schedule storage binder supplied separately through the repair parts department.

A. TIME ALLOWANCE

The times listed in this publication are the result of careful study of the operation concerned; they represent the average time ONE trained dealer mechanic, of normal ability has taken to carry out the operation in a typical dealership, using standard workshop tooling and equipment including air tools, located for reasonable access and working conditions. They DO NOT include any traveling to or from the farm or site.

The machine is assumed to be clean and to be bare of any extra equipment or attachment of non "AGCO" manufacture, and delivered to an authorized and duly equipped workshop where trained personnel and spare parts required to perform the operations are immediately available.

The times given include difficulties encountered working on used as opposed to new machines, and are based on methods and recommended tools shown in the workshop manual.

The times are based on a second hand machine in reasonable condition properly maintained using approved parts. Extra time may be required to deal with seized, rusted or damaged parts.

Allowances are included in the operation times quoted for obtaining all tools and parts, cleaning and testing after repair. Diagnostic time is included in the time allowance unless a separate code is listed for diagnostic time.

The times given in this Repair Time Schedule are for a complete job from start to finish, including allowances for intermediate operations.

B. TIMES

All the operating times are presented in hours and the decimal parts of an hour. Decimal times must be used on all warranty claims.

The times given in this repair time schedule are for a complete job from start to finish. Where access has been gained for an adjacent repair only the additional time for the second repair will be accepted and not the total time for the two failures.

C. REVIEW OF TIMES

If you find any improvement in the method which reduces the time of an operation or you find you cannot meet an operation time after more than three attempts using the recommended method, a "Request for Review of Time" form (see next page) must be submitted quoting all relevant details. Photo copy the form and fax it to the following address:

AGCO Corporation

Attn: Technical Services and Support

FAX (620) 327-5713

D. AMENDMENTS

All times contained in this schedule are based on the latest information available at the time of this publication. The right is reserved to publish revision at any time. All operation times are subject to amendment if the design, method or technique changes result in alteration of time taken.

E. REQUEST FOR REVIEW OF TIME SCHEDULE

Request for Review of Time Schedule

Dealer Name: _____ Date: _____

Address: _____

RTS Publication No.: _____ Failure Code No.: _____

Machine Model: _____ Serial No.: _____

We disagree with your time allowance against the above failure code number. We have observed and accurately timed this operation as carried out by a trained mechanic using recommended procedures and special tools. Our findings are detailed below:

Analysis of Time			
Work Performed	Time		Remarks
Remove Component			
Dismantle			
Clean and Inspect			
Obtain Parts and tools			
Reassemble			
Reinstall			
Adjust and test			
TOTAL OF TIME			
Number of mechanics used on job.			

Printed Name: _____ Signed: _____
